General Purpose Container

BOXES, CASES, SACKS, BALES, PALLETS, CARTONS, BAGS, DRUMS

This container is fully enclosed and weatherproof, with a rigid roof, sidewalls and floor. It carries most 'dry goods' including those packed in boxes, cases, sacks, bales, pallets and drums.

With adaptations, general purpose containers can move some dry and liquid bulk cargo. For instance, flexitanks allow food like wine and non-hazardous liquid chemicals to be moved using this container type.
